LEEOR SHEMESH

Tarzana, CA
(+1)818-472-4432 ⋄ leeorshemesh1@gmail.com ⋄ LinkedIn

EDUCATION

University of California, Santa Barbara 2024 – 2028
Bachelor of Science, Computer Science
GPA: 3.87
Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Architecture
Discrete Mathematics, Linear Algebra, Probability and Statistics, Multivariable Calculus

SKILLS

Languages	C, C++, Python, Java, JavaScript, HTML/CSS, Dart
Frameworks/Libraries	React, Next.js, Node.js, Flask, Tailwind CSS, Flutter
Tools/Systems	Docker, Git, Linux, Playwright, OpenAI API

EXPERIENCE

Early Research Scholars Program – Undergraduate Researcher Sep. 2025 – Jun. 2026 *Isla Vista, CA*

- Developed a mobile application using Flutter and Dart to classify and analyze screen time behavior utilizing neural networks
- Designed core application workflows and system architecture for collecting user input, processing classification data, and visualizing behavioral feedback
- Applied machine learning, mobile development, and data visualization techniques to support user-focused research and interactive analytics
- Presented the project at a research symposium through a technical poster presentation, effectively communicating the application's methodology, machine learning approach, and findings to diverse audiences

PROJECTS

KOS, *MIPS Operating System, C, Linux* 2026

- Built a custom MIPS-based operating system focused on low-level systems programming concepts including memory management, process handling, and kernel architecture
- Implemented foundational operating system functionality while exploring computer architecture and systems design principles

ClassifAI, *Flutter, Dart, Neural Networks, Mobile Development* 2026

- Developed a mobile application for analyzing and classifying user screen time behavior through neural network models
- Integrated behavioral analytics visualization and interactive feedback systems to support research-focused user insights

Media Outreach Automation Platform, *Python, Playwright, Automation* 2025

- Developed automation tools for streamlining magazine social media operations, advertisement distribution, and community engagement workflows
- Automated repetitive outreach and posting tasks to improve operational efficiency and audience interaction
